

Business park Rietveldenweg, Den Bosch

Business Park Rietveldenweg 32 comprises four buildings – so-called ‘Plants’ – that are suitable for a variety of uses. Three of the buildings have been finished to a very high standard for office, research and development activities. The surrounding grounds were redeveloped and landscaped in 2017 to create a campus for technology company TE Connectivity. The work created parking for 238 cars, a new cycle path and modern entrance zones to the offices. Along the southeast side, the car park has been separated by the addition of a new partition. The adjacent cross-dock distribution complex is used by leading storage and transshipment company A2 Logistics Engineering B.V.
